

# Teamwork Intelligence

The Smart Way to Build a Team

Workshop  
Format

## SO, WHAT IS TEAMWORK INTELLIGENCE?

Teamwork Intelligence is the purposeful and intentional relational process of team members together raising one another to higher levels of motivation, collaboration, compassion, and performance. It's deceptively simple: in order to build a high-performing team culture you have to create the conditions for team members to commit and unify—to coalesce into a single unit. Such oneness is not inevitable; it must be forged methodically and deliberately.

## WHY IS TEAMWORK INTELLIGENCE THE SMART THING TO DO?

A significant aspect of teamwork intelligence is knowing the expectations one should have of one's teammates. One of the most significant expectations is that of high-level ownership with the purpose of each player investing in the development of a high-performing team. Through expectations and collective achievements, identification, loyalty, and trust are built. The goal and expected outcome is the development of the team's full potential.

Cory L. Dobbs Ed.D.
